

LEWIS I. ELSON, D.D.S., P.C.

Cosmetic, Implant and Restorative Dentistry

Fall 2003

NEWSLETTER

We are pleased to send you our yearly Fall/Winter Newsletter to update you on that which is new and exciting in the world of dentistry and more in particular, in our office.

Dentistry continues to evolve with advancements that provide the patient with improved treatments. The continued changes with newer techniques and devices in Implant Dentistry have made this phase of treatment even more successful and esthetic. If you have any questions regarding how this affects your dental needs, please call our office.

As a progressive dentist, I strive to provide my patients with all the latest technologies. We have installed a digital x-ray system which provides a decrease in radiation of up to 80%. It shows an enhanced and accurate image in seconds, and contributes greatly to a positive diagnosis.

A favorite question many of you have is on the subject of laser cosmetic bleaching and smile makeovers. Our laser provides safe, pain-free, immediate, and terrific results. Veneers (smile makeovers) are done in two appointments which will close spaces between teeth so your smile is straight and beautiful.

Now that the year is coming to a close, I want to remind all of my patients who are due for their regular exam, those who are overdue, or patients considering cosmetic or laser changes, to please call our office for an appointment.

For those of you who have dental insurance, please make sure to maximize your benefits for the year 2003.

Once again we appreciate the family and friends that you have recommended to us in the past and we look forward to welcoming your referrals in the future.

As always, with the coming holiday season, best wishes for a Healthy and Happy New Year.

Sincerely,

A handwritten signature in dark ink, appearing to read 'L. Elson', written in a cursive style.
