Suite: 206

Dear Lewis:

It has been a little over three months since I walked out of your office with my new smile complete and I cannot begin to tell you how happy I am as a result of your magnificent work. I am so much more comfortable now, both at work and in social situations, that at least once a day, I look in the mirror and cannot believe it's me in the reflection.

Your attention to detail was amazing, both in the basic repair work that I needed and in the evaluation and application of the porcelain veneers. At all times, you made me feel like I was your important patient and that the work you were doing in my mouth was going to be the best you have ever done. Well, given what I looked like when I first walked into your office, I can honestly say that the results exceeded my most optimistic expectations of what you could do to help me.

What made the entire experience so extraordinary, however, was that you combined your dental expertise with being a very caring and compassionate individual. You showed me respect from the moment I met you and never focused on anything but the positive aspect of what you could do to help me meet my objective of having a great smile again. It is this side of you, combined with the gift you have for outstanding dental work, that makes you a "one in a million" type of person.

I could not close this letter, without a special "THANK YOU!" to your entire team:

In conclusion, I would recommend Dr. Elson and his team to my closest friends and family as "THE BEST DENTAL TEAM IN THE ENTIRE U.S.A".
